What is Tor Browser?

- **Tor Browser automatically starts Tor processes and routes traffic through the Tor network.**
- **Tor software protects you by bouncing your communications around a distributed network of relays run by volunteers all around the world.**
- **Tor Browser:**
 - **prevents somebody watching your Internet connection from learning what sites you visit**
 - **prevents the sites you visit from learning your physical location**
 - **lets you access sites which are blocked**
- **Upon termination of a session the browser deletes privacy-sensitive data such as cookies and browsing history.**
- **...and because it is self contained, it does all this without needing to install any software.**

Tor Browser

- Tor Browser automatically starts Tor processes and routes traffic through the Tor network.
- Tor software protects you by bouncing your communications around a distributed network of relays run by volunteers all around the world.
- Tor Browser:
 - prevents somebody watching your Internet connection from learning what sites you visit
 - prevents the sites you visit from learning your physical location
 - lets you access sites which are blocked
- Upon termination of a session the browser deletes privacy-sensitive data such as cookies and browsing history.
- ...and because it is self contained, it does all this without needing to install any software.

What is Tor Browser?

“There is no sentient human being in the Western world who has little or no regard for his or her personal **PRIVACY; those who would attempt such claims cannot withstand even a few minutes' questioning about intimate aspects of their lives without capitulating to the intrusiveness of certain subject matters.”** - Canadian privacy expert David Flaherty

Why use Tor Browser?

- **Protect your privacy from unscrupulous marketers and identity thieves.**
- **Protect your communications from irresponsible corporations.**
- **Protect your children online.**
- **Freedom to research sensitive topics.**
- **Skirt surveillance.**
- **Circumvent censorship.**

What now?

- **Please consider running a relay to help the Tor network grow.**
- **Do you have an Amazon account? Are you willing to spend up to \$3 a month? Then spin up your own Tor bridge in less than 10 minutes with tor cloud!**
- **Tell your friends! Get them to run relays. Get them to run hidden services. Get them to tell their friends.**
- **If you like Tor's goals, please take a moment to donate to support further Tor development. They're also looking for more sponsors — if you know any companies, NGOs, agencies, or other organizations that want anonymity / privacy / communications security, let them know about us.**
